The information below indicates any exceptions or limitations pertaining to the designs on the previous page. For a detailed listing of a particular product specification, refer to the page indicated.

Species	
Material Pricing Guide	Astoria – 3/4" thick Caramelized Bamboo, Cherry, Hard Maple, Rift Cut White Oak and Walnut plywood only. Savoy – 3/4" thick Caramelized Bamboo, Cherry, Hard Maple, Rift Cut White Oak and Walnut plywood only.
Edge Profiles	
pg 7.1	Design specific, no options available. For accompanying wood products, order Machine Edge for Savoy and L-034 edge for Astoria.
Options	
pgs 7.3-7.15	<p>All designs – concealed hinge boring and Soss hinge boring. Horizontal grain direction available. Sequential grain matching is available on 1-Piece designs only; see following page for program details and pricing. Sequential Grain Match Order Form in Order Forms Section of manual.</p> <p>Note: Wenge available in Natural finish only. Colourtones, primers and Prism Paints are not available on edgeband doors. Use MDF slab with L-034 or Machine Edge as an alternative to utilize Colourtones, primers and Prism Paint finishes.</p>
Mullions/Frame Only	
pgs 6.1-6.13	<p>Mullion designs are available in solid Caramelized Bamboo, Cherry, Hard Maple, Rift Cut White Oak and Walnut only; order as CRP-10 door with square bead. Astoria and Savoy designs are available as frame only. Design Charges: Astoria, Savoy.</p> <p>Note: Solid mullion doors may accept stain different than plywood doors.</p> <p>Please note that when Astoria or Savoy Frame Only is ordered, a medium gray retainer moulding is automatically included (upcharge applies). The retainer moulding covers the raw substrate eliminating the need to mask visible substrates.</p> <p>Note: Astoria and Savoy Frame Only pricing is calculated using the Design Charge plus the actual square footage multiplied by the material square foot charge. In addition, the following upcharge must be applied for retainer moulding:</p> <p>1.0 to 4.0 sq. ft. 4.01 to 7.0 sq. ft. 7.01 sq. ft. or larger</p>  <p>Retainer Moulding</p>
Appliance Panels	
pg 6.22	Apply over plywood available in Bamboo, Cherry, Hard Maple, Rift Cut White Oak and Walnut only.

Note: Astoria and Savoy 1-Piece designs will receive a stamp on the back of the door in the bottom left corner to indicate which side is the back of the door. The stamp consists of three small indentations in a triangular pattern which in most cases will be eliminated or partially eliminated when bored for concealed hinges. Frame only options will not receive this stamp.

Sequential Grain Matching

- Sequential Grain Matching is available with Astoria and Savoy doors and drawer fronts.
- Vertical or horizontal grain orientation is available and must be specified.
- Grain matching will flow through all of the associated doors and/or drawer fronts on individual cabinets.
- Grain will not match from cabinet to cabinet.
- Due to the cutter diameter required to cut panel blanks, spacing is 1/8" between sequentially matched components unless otherwise noted on specific templates.
- Each door and drawer front will be identified to designate its sequence within a cabinet. Doors and drawer fronts will be stamped on the edge in the lower right corner with a numeric/alpha code combination to represent your item number and all of the related pieces to that specific item. (Example: 1A, 1B, etc.)
- Doors and drawer fronts that require sequential matching are priced using the Material Charges listed below by specie.
- Maximum cabinet sizes cannot exceed 46" across the grain or 94" with the grain.
- Additional information regarding the Sequential Grain Matching program, including configuration templates, is available on the Customer Business Portal or in a PDF file. Contact your Sales Representative or Customer Service.
- In the event that a replacement is needed, the entire template (series of doors and drawer fronts) will need to be reordered to ensure a consistent grain match.

Ordering Instructions

- To achieve Sequential Grain Matching, all corresponding doors and drawer fronts will be cut from an oversized blank.
- Doors and drawer fronts requiring Sequential Grain Matching must be ordered using Conestoga's Sequential Grain Matching (SGM) Templates and Order Form #2 to identify the specific cabinet configuration, position and sequence of the individual pieces within a cabinet.
- Select the appropriate SGM template number from PDF that matches your cabinet configuration. Indicate the grain direction of your doors and drawer fronts (vertical or horizontal).
- Following the alpha sequence of the template, enter your doors and drawer fronts in positions A, B, C etc., width x height.
- Indicate whether each piece is being used as a door or a drawer front.
- Specify concealed hinge boring and grain direction, as well as any special instructions in the notes section.

Premium Grade Upcharge

Add 35% to Standard grade price. Veneer doors ordered in Premium grade will receive Premium framing and Standard grade panel.

1" Thick Material Upcharge

Add 30% to Standard grade price for doors, 20% for drawer fronts.

Ordering both premium and 1"

Material Charges are cumulative.

Frame Only Glass Doors

Refer to "Frame-Only" page 6.1 in Accent Doors and Panels for pricing instructions.

*Knotty Pine crown and trim mouldings will be manufactured using Clear White Pine materials. If Clear White Pine doors, drawer fronts and front frames are desired signify Premium grade upgrade.

**Hybrid Products – Defined as solid wood framing with MDF panels. Hybrid Products are recommended when using opaque finishes such as Colourtones and Prism Paints to avoid stave lines and veneer checking after finish is applied.

 1" thick material available in Cypress and Mahogany.
 Additional lead-time may be required.
 Conestoga finishes are intended for interior use only. Exterior grade finish materials must be used for exterior cabinetry.

The chart below indicates how much a 12" wide panel of various exterior species can expand as a result of an increase in moisture content from 5% to 14%. For example, the chart reveals that a Teak panel that is 12" wide could expand by more than 3/16". A lower value, as shown in the chart below, is directly related to the dimensional stability of the panel. For example, Teak (12.20") and Thermally Treated Poplar (12.11") are more dimensionally stable and consequently have a reduced risk of bow/warp/twist than the other species listed on this chart; however, bow/warp/twist are never eliminated.
 As shown in the chart on page 3.4 and below, Hard Maple is used as the baseline for wood expansion; however, it is not intended to be used as an external specie.

Wood expansion caused by an increase in moisture content
