Pricing Procedure for Doors and Drawer Fronts

The price for any custom door or drawer front can be easily calculated by inserting the relevant numbers into the chart below. A brief explanation for reference is given for each required number.

Example 1 – 1 CRP-10 in Standard Grade Hard Maple, 3/4" thick, 15" x 25"

Example 2 – 1 CRP-10 with radius corners in Premium Hard Maple, 1" thick, 15" x 25"

Product Design Choices

All of Conestoga's door and drawer front prices include a choice of edge profile, framing bead and panel raise. However, L-297, L-304 and LC-Inset edge profiles incur an extra charge. For complete details on available options and associated prices, see the Design Options Section.

Before pricing a door or drawer front, verify the availability of the desired options on the design by referring to the Offering and Availability information found immediately after each door design page.

Multiple panel doors have Design Charges equivalent to the number of panels ordered. As an example, a CRP-10 with three panels uses the Design Charge. This policy excludes doors that come standard with multiple panels (i.e. CRP-10102). *Due to construction complexity, all multiple panel miter doors include an additional charge per center stile or midrail plus the per-panel Design Charge.*

Offering And Availability

All Conestoga products are available in a wide variety of specifications to satisfy your custom needs. The information below indicates any exceptions or limitations pertaining to the designs on the previous page. For a detailed listing of a particular product specification, refer to the page indicated.

Species	
Material Pricing Guide	Astoria and Savoy – 3/4" thick Caramelized Bamboo, Cherry, Hard Maple, Rift Cut White Oak and Walnut plywood only.
Edge Profiles	
pg 7.1	All designs – design specific, no options available. For accompanying wood or MDF products, order Machine Edge to replicate Savoy and L-034 edge to replicate Astoria.
Options	
pgs 7.3-7.15	All designs – weathered grain, concealed hinge boring and Soss hinge boring. Horizontal grain direction available. Sequential grain matching available; see following page for program details and pricing. Sequential Grain Match Order Form in Order Forms Section of manual. Note: Colourtones, primers and Prism Paints are not available on edgeband doors. Use MDF slab with L-034 edge to replicate Astoria or Machine Edge to replicate Savoy as an alternative to utilize Colourtones, primers and Prism Paint finishes.
Mullions/Frame Only	
pgs 6.1-6.13	Mullion designs are available in solid Caramelized Bamboo, Cherry, Hard Maple, Rift Cut White Oak and Walnut only; order as CRP-10 door with square bead. Astoria and Savoy designs are available as frame only. Design Charges: Astoria, Savoy. Note: Solid wood mullion doors may accept stain different than plywood doors. Please note that when Astoria or Savoy frame only is ordered, a medium gray retainer moulding is automatically included (upcharge applies). The retainer moulding covers the raw substrate eliminating the need to mask visible substrates. Note: Astoria and Savoy frame only pricing is calculated using the Design Charge above plus the actual square footage multiplied by the material square foot charge. In addition, the following upcharge must be applied for retainer moulding: 1.0 to 4.0 sq. ft. 4.01 to 7.0 sq. ft. 7.01 sq. ft. or larger

Retainer Moulding

Note: Astoria and Savoy designs will receive a stamp on the back of the door in the bottom left corner to indicate which side is the back of the door. The stamp consists of three small indentations in a triangular pattern which in most cases will be eliminated or partially eliminated when bored for concealed hinges. Frame only options will not receive this stamp.

Sequential Grain Matching

- Sequential Grain Matching is available with Astoria and Savoy doors and drawer fronts.
- Vertical or horizontal grain orientation is available and must be specified.
- Grain matching will flow through all of the associated doors and/or drawer fronts on individual cabinets. A maximum of 6 pieces is permitted within a single cabinet.
- Grain will not match from cabinet to cabinet.
- Due to the cutter diameter required to cut panel blanks, spacing is 1/8" between sequentially matched components unless otherwise noted on specific templates.
- Each door and drawer front will be identified to designate its sequence within a cabinet. Doors and drawer fronts will be stamped on the edge in the lower right corner with a numeric/alpha code combination to represent your item number and all of the related pieces to that specific item. (Example: 1A, 1B, etc.)
- Doors and drawer fronts that require sequential matching are priced using the Material Charges listed below by specie.
- Maximum cabinet sizes cannot exceed 46" across the grain or 94" with the grain.
- Additional information regarding the Sequential Grain Matching program, including configuration templates, is available on the Customer Business Portal or in a PDF file. Contact your Sales Representative or Customer Service.
- In the event that a replacement is needed, the entire template (series of doors and drawer fronts) will need to be reordered to ensure a consistent grain match.

Ordering Instructions

- To achieve Sequential Grain Matching, all corresponding doors and drawer fronts will be cut from an oversized blank.
- Doors and drawer fronts requiring Sequential Grain Matching must be ordered using Conestoga's Sequential Grain Matching (SGM) Templates and Order Form #2 to identify the specific cabinet configuration, position and sequence of the individual pieces within a cabinet. Templates for cabinet configurations from 2 - 6 pieces.
- Select the appropriate SGM template number from PDF that matches your cabinet configuration. Indicate the grain direction of your doors and drawer fronts (vertical or horizontal).
- Following the alpha sequence of the template, enter your doors and drawer fronts in positions A, B, C etc., width x height.
- Indicate whether each piece is being used as a door or a drawer front.
- Specify concealed hinge boring and grain direction, as well as any special instructions in the notes section.

1" thick material available in Cypress and Mahogany.

Additional lead-time may be required.

Conestoga finishes are intended for interior use only. Exterior grade finish materials must be used for exterior cabinetry.

The chart below indicates how much a 12" wide panel of various exterior species can expand as a result of an increase in moisture content from 5% to 14%. For example, the chart reveals that a Teak panel that is 12" wide could expand by more than 3/16".

A lower value, as shown in the chart below, is directly related to the dimensional stability of the panel. For example, Teak (12.20") and Thermally Treated Poplar (12.11") are more dimensionally stable and consequently have a reduced risk of bow/warp/twist than the other species listed on this chart; however, bow/warp/twist are never eliminated.

As shown in the chart on page 3.4 and below, Hard Maple is used as the baseline for wood expansion; however, it is not intended to be used as an external specie.

Wood expansion caused by an increase in moisture content

Thermally-Treated Poplar	12.11"
Teak	12.20"
